The Best Practices in quality assurance in education Institute of Physical Education Samutsakhon Campus

Abstract

Research best practices in quality assurance Institute of Physical Education Samutsakhon Campus

For the aimed:

1.To determine the current condition of providing quality education Institute of Physical Education Samutsakhon Campus.

2.To present best practices for ensuring the quality of education education Institute of Physical Education Samutsakhon Campus.

It causes problems and the quality of education is not achieved and to make the organization successful operation in quality assurance.

Resources in the research was based on interview with those responsible for quality assurance studies, of education in both public and private 13.

The results showed that:

The quality of education to day personnel with the knowledge and understanding of quality assurance. In the preparation of quality assurance. In the preparation of quality assurance personnel are prepared by training and quality assurance to make people more aware of the work engine management system and the appointment of personnel to monitor the performance indicator and a contiguously with the implementation of the PDCA process to prepare the workforce. Document and Evidence with the assessment, problem and causes the quality of education can not achieve the goal. One reason is that the co-operation of personnel how to make the organization successful operation in quality assurance is that Leadership a priority, positive and attitude toward work and changes to the system of work is clear and systematic
